

WORKSHOP:
BECOMING
CHIMERIC

Augmented Reality,
AI and the Gitch

by MARTINA MENEGON

2025

My Practice

I'm an artist, writer, educator and researcher

in my works,

I look for poetic and subversive strategy for reshaping the self

+ I create intimate

assemblages of physical and virtual elements that explore embodiment, hybridity and the chimeric nature of contemporary corporeality.

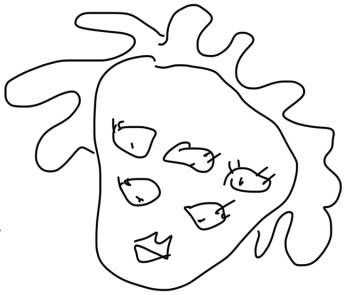

I embrace FRAGMENTATION and MULTIPICITY. Through my art I am allowed to GIRTH, MORPH, UNFOLD, SHAPESHIFT...

Digital spaces become sites of coercion and resistance, and avatars emotional extensions and intimate containers of contradiction...

WORKSHOP CONCEPT

the workshop
is not only about
making avatars or
exploring new tools...
+ how we
self-k

exploring how we self-body
it's about over space
understand in digital

a Rapture reveals
that

Method
not
Elast

Gitchi

an-1

Chimeric operations

opponents
do not only
create distortions
as help

they can help
create a space
where a

access becomes
identity

Background Removal Tool

[Image Upload](#) [URL Input](#) [File Output](#)

① IMPORT YOUR SELFIE

② click here ↗

③ right-click and save IMAGE AS

③ MAKE A CHIMERA

add extra parts, flowers, body parts, tentacles etc. animal tentacles etc. go wild! ❤

TIP: USE TEXT TO 3D TO generate the "body parts"

LUMA AI "GENIE"

⑥ GENERATE YOUR 3D CINEMA

USE IMAGE TO 3D

To transform your photo in a 3D model ❤

EASY:

① POLYCAM

SCAN
THIS ➔

- FREE!
- POLYCAM
 - PiFuHD
 - TriPoSR
 - INSTAMESH
 - SPAR 3D

The screenshot shows the Polycam library interface. On the left, there's a sidebar with 'Library', 'Captures', and 'Albums'. The main area has a 'Create' tab selected. It lists several options:

- Create a photogrammetry model
- Create a Gaussian splat
- Upload a 360
- Upload a 3D asset
- Generate a 3D model
- Create a new Scene

A QR code is displayed with the text "SCAN THIS ➔".

Follow the steps

When your cinema is ready click here

The screenshot shows the 'Export' dialog box. It has sections for 'Export to' and 'All formats >'. Under 'MESH', 'GLTF' is selected. Other options include 'OBJ', 'FBX', 'DAE', 'STL', and 'USDZ'. Under 'POINT CLOUD', 'PLY' is selected. Other options include 'LAS', 'PTS', 'XYZ', and 'DXF'. Under 'OTHER', 'Video' and 'Blueprint' are listed. At the bottom is a large 'Export' button.

③ DOWNLOAD GLTF

④ export

Alternatively...

Run

Download

① AUGMENT

upload your .GLB
and experience it in AR

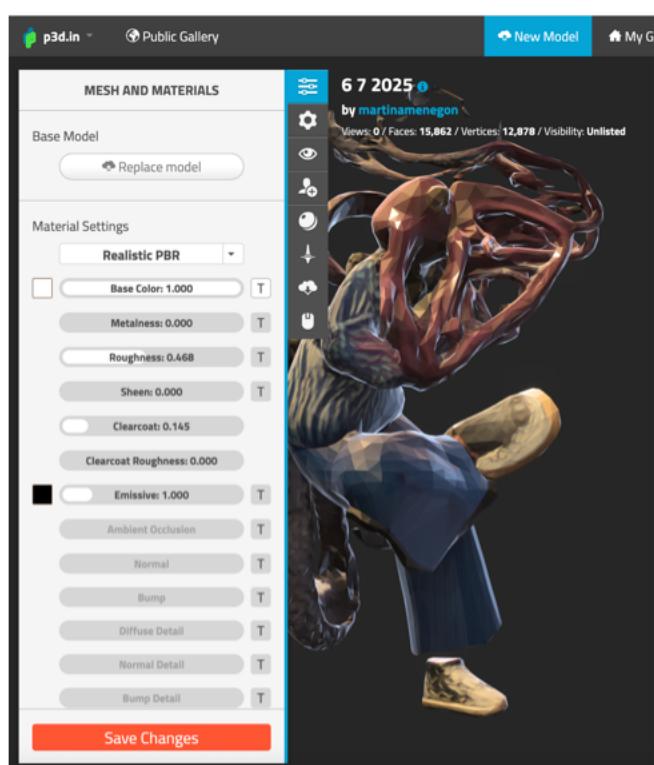

P3D.IN

IS a nice
place to
start

SCAN
THIS ➔

② DRAG AND DROP
your .GLB
(the file you
downloaded
from PolyCom)

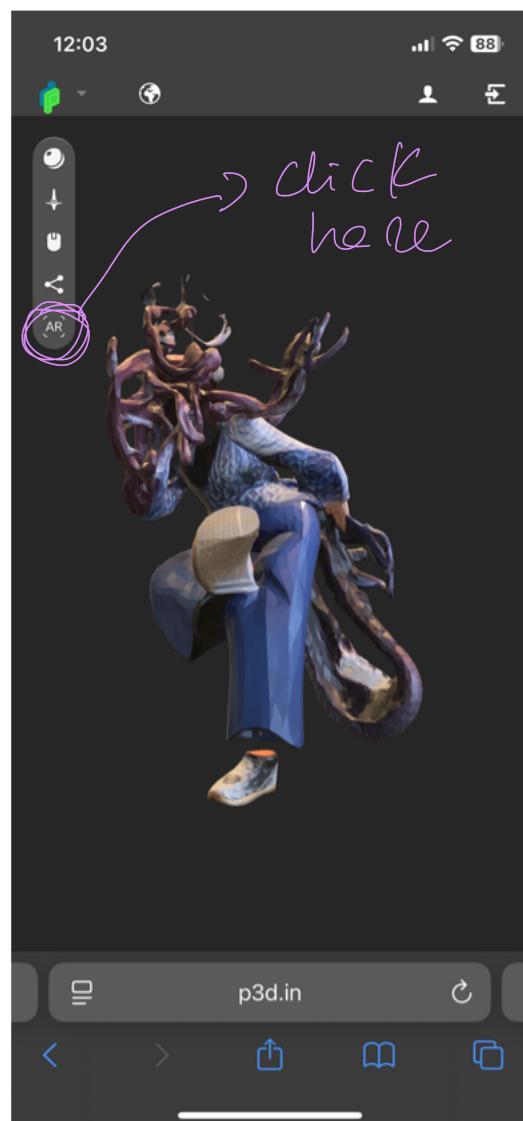

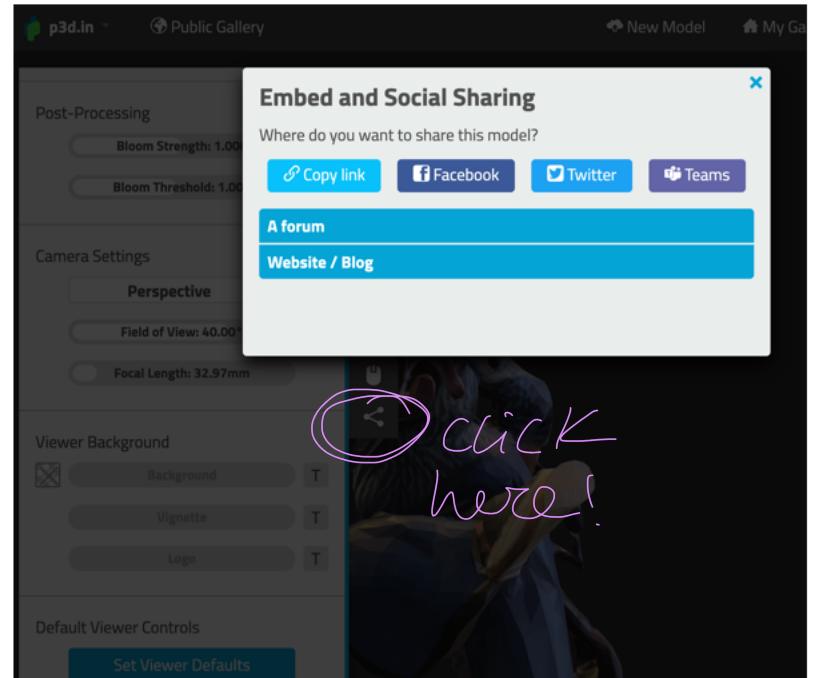

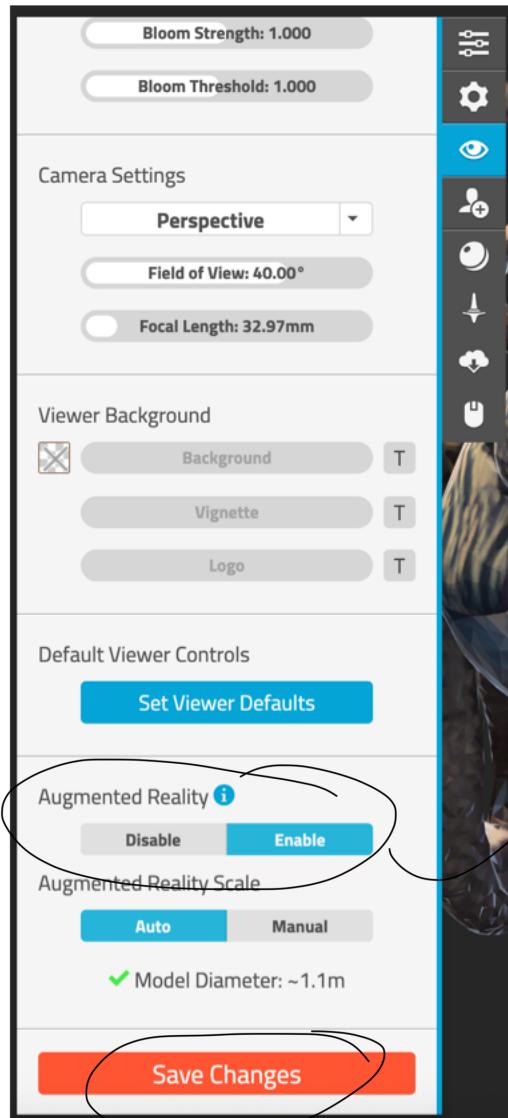

③ make it
pretty !!

④ Give it a name

TIP: if your
model is very
"pixelated", you can
pass through
Blender and/or
do a shader
to a smooth

⑥ ENJOY

Spend some
time in
hybrid
reality with
your new
chimeric
Glitch
self ❤
